## YINCAE Exhibiting at ECTC 2015

(Albany, NY) March 9, 2015. YINCAE Advanced Materials LLC is excited to announce that we will be exhibiting at the upcoming event ECTC 2015! This year, ECTC will take place from May 26<sup>th</sup> to 29<sup>th</sup> at the Sheraton San Diego hotel & Marina in San Diego, California. As we prepare for the upcoming event, we hope that you are looking to attend the show as well. Come by our booth 815 and take one of our convenient tri-folds, learn more about the array of products we have available, and ask us any questions that you may have. YINCAE hopes that you will be attending the show, and stop by to learn more about YINCAE and the innovative products that we have to offer!

The ECTC (Electronic Components and Technology Conference) is an international event that showcases the best in packaging, component, and microelectronic systems, science, technology and education in an environment of cooperation and technical exchange.

YINCAE Advanced Materials, LLC is in the field of encapsulant adhesives and has developed several encapsulant products that have been successfully adopted by major microelectronics product and contract manufacturers. Our encapsulant products have solved a number of technical issues related to microchip solder joint strength, uniformity, and thermocycling. Tests comparing flux in nitrogen versus encapsulants in normal air flow have demonstrated that encapsulants can increase pull strength by 5 times while reducing thermal cycling failures by 10 times, with a reduction in solder voids of up to 79%. This data translates to significant production savings for microelectronics manufacturers. YINCAE has unique and exclusive products that no other company has developed. There is a lot that can be taken away from not only our booth and products, but from the ECTC 2015 conference as a whole. YINCAE hopes to see you there at the ECTC 2015. Please visit us at booth 815!
