# Press Release

## **World's Best Flip Chip Underfill:** **SMT 158 Series**

**(Albany, NY) August 12, 2014.** YINCAE Advanced Materials, LLC is pleased to announce the availability of a series of new underfill products that enables fast flowing, excellent reliability, and use on several different applications. This combination of characteristics enables SMT 158 series to be the world's best flip chip underfill.

The SMT 158 series is customizable in color, filler concentration, and particle sizes to meet each individual customer's needs. This underfill has excellent reliability and has an extremely fast flow. It cures fast and in low temperatures. It can be utilized for bare chip protection in advanced packages like memory cards, chip carriers, hybrid circuits, and multi-chip modules. Using SMT158 will eliminate the cleaning process. SMT 158 series is compatible with lead free processes and is good for ultra-low bump applications. It can be used on several applications like chip scale packages, ball grid array devices, PoP, land grid array, and some flip chip applications. SMT 158 series provides mechanical resistance and minimizes induced stresses.

**MORE...**

Underfill products have been around for a while, however an underfill product like the SMT 158 series distinguishes itself from the competition. It can be applied to several applications and is customizable to meet the needs of the customers.

Additional information on the product series is available on our Website at: <http://www.yincae.com/technical-information.html> or by contacting YINCAE at: [tfarrell@yincae.com](mailto:tfarrell@yincae.com).

\* \* \* \* \*

YINCAE Advanced Materials, LLC is a leading manufacturer and supplier of high-performance coatings, adhesives and encapsulants used in the computer microchip and optoelectronics industries. Our manufacturing operations and headquarters are located in Albany, NY USA, with technical sales and support available through a worldwide sales and service organization.
